Disclaimer Regarding Forecast Statements

Statements made in this release with respect to Kubotek's forecast for FY2005, are based on assumptions and beliefs in light of the information currently available to us, and therefore investors should not place undue reliance on them as they make a judgement about their investment. Kubotek cautions investors that a number of important factors could cause actual results to differ materially from those discussed in the forecast statements. Our major product of display inspection systems, such as for liquid crystal display are for highly competitive markets characterized by keen demand for production efficiency, quick adaptation of emerging new materials and rapid development of production technology. And this industry is strongly affected by factors such as demand fluctuation, the general trend of capital market, pricing pressures, and general economic conditions in east Asia market. Moreover, exchange rates between yen and other currencies in which Kubotek possibly makes significant sales or in which Kubotek's assets and liabilities are denominated, may change to influence the business performances, though Kubotek's business is yen-based so far.
