

## HANIWA SPEAKER SYSTEM PRODUCT LINE UP

3 WAY SERIES	Configuration	Channel Divider	Dimension (HWD)
		HCHD04 ( Cross Over )	
HSP3W 12	12" Cone Woofer 3" Compression Driver Mg Ring Tweeter	350Hz, 15kHz	1300 x 860 x 600
HSP3W 10	10" Cone Woofer 3" Compression Driver Mg Ring Tweeter	400Hz, 15kHz	1150 x 730 x 510

2 WAY SERIES	Configuration	Channel Divider	Dimension (HWD)
		HCHD03 ( Cross Over )	
HSP2W 10	10" Mg Alloy Woofer 3" Compression Driver	450Hz	1100 x 700 x 450
HSP2W 08	8" Mg Woofer 3" Compression Driver	500Hz	1050 x 620 x 420
HSP2W 07	7" Mg Woofer 3" Compression Driver	550Hz	950 x 520 x 400
HSP2W 06	6" Mg Woofer 3" Compression Driver	600Hz	730 x 430 x 360

Small Horn SERIES	Configuration	Channel Divider	Dimension (HWD)
		HCHD03 ( Cross Over )	
HSP2H 07	7" Mg Woofer 2" Compression Driver	800Hz	580 x 400 x 270
HSP2H 06	6" Mg Woofer 2" Compression Driver	1kHz	500 x 320 x 240

Small Dome SERIES	Configuration	Channel Divider	Dimension (HWD)
		HCHD03 ( Cross Over )	
HSP2D 07	7" Mg Woofer 29mm Dome Tweeter	2kHz	550 x 350 x 270
HSP2D 06	6" Mg Woofer 27mm Dome Tweeter	2.5kHz	500 x 320 x 240

HANIWA speaker systems are designed to be used with our digital channel divider, to perform at their best.

The digital channel divider has the pre-set parameters of digital signal processing, tuned to each of the HANIWA speaker systems. This tuning is done by actually feed-back the playback sound to the audio measurement system, and set up the best parameters of digital signal processing so that the gain and phase curves of the playback becomes flat all through the audio bandwidth.

There are three series of the speaker systems; 3 way systems, 2 way systems and the small speaker series. Meanwhile, the digital channel divider has two lines of products; the general purpose models and fully tuned models. The general purpose models provides most flexible control over all the aspects of digital signal processing, while the fully tuned models are ready to be used with the matched HANIWA speaker systems.

Fully tuned Digital Channel Divider

THE ALL-ROUND PLAYER OF HANIWA SPEAKERS PROVIDE ACCURATE REPRODUCTION OF MUSIC SOURCES.

2 Way Systems are the standard models of HANIWA audio system, which reproduces the contents of musical sources with highest accuracy ever heard of.

You will find out how much of musical contents were left unheard before you listen to these speakers performing with the tuned digital channel divider HCHD03.

These speakers have the improved Tractrix horn covering the very wide mid- to high-range, and the cone woofer with expansion horn producing the rich bass sound without losing its articulation.

## 2 WAY SYSTEMS

HSP2W08

HSP2W10

THE SOUND STAGE WILL APPEAR IN FRONT OF YOU, WITH INCREDIBLY VIVID FULL RANGE SOUND, OUT OF THE SMALL SIZE SPEAKERS.

THE FLAGSHIP MODEL OF HANIWA SPEAKERS RE-CREATES GORGEOUS PERFORMANCES OF VARIOUS ARTISTS.

## SMALL SPEAKER SERIES

Small Speaker Series was developed, so that more listeners can enjoy the true music with natural sound stage.

You would never imagine the richness of the music, created out of these small size speakers.

This product line consists of horn and dome types, each with further variation of woofer size, 6" and 7". They are designed to be used with the tuned HANIWA digital channel divider HCHD03, to create the vivid sound stage in front of you.

3 Way Systems are the flagship models within the HANIWA audio system, which re-creates the sound stages from the wide range of musical genres.

You can enjoy the gorgeous audio life with these speakers, from the symphony, opera or full band jazz, to the delicate sonatas or jazz combo, with the tuned digital channel divider HCHD04.

The speaker has the improved Tractrix horn to cover the wide mid-range, the cone woofer with expansion horn and the sensitive Magnesium ring tweeter, not to miss any sound components of music.
